2017 MAZDA5 KEY CHANGES

- Equipment unchanged from 2016 model year
- Colour changes:
 - Crystal White Pearl (34K) is replaced with Snowflake White Pearl (25D)

17MY Fuel Economy Update

As previously communicated, there has been a change in the 5-cycle fuel consumption testing methodology that is effective starting with 17MY vehicles.

This change uniformly affects all manufacturers selling applicable vehicles in Canada. The fuel consumption ratings referred to are those recognized and catalogued by Natural Resources Canada. In the United States, the Environmental Protection Agency is also adopting a revised testing methodology for 17MY vehicles.

As a result of this new testing, situations could result where published fuel economy results change 17MY versus 16MY. This could occur despite a 17MY vehicle not exhibiting any changes from the 16MY vehicle.

Note also that changes in trim mix and equipment from model year to model year can also have an effect on the published fuel consumption numbers. Therefore, if there are changes on the published numbers between 17MY and 16MY, it could be any combination of these that are contributing to the differences.

- Fuel economy ratings for 2016 model year:

Fuel Economy Ratings (L/100km)

	6MT	5AT SPORT
City	11.1	10.8
Highway	8.3	8.3

- New fuel economy ratings for 2017 model year:

Fuel Economy Ratings (L/100km)

	6MT	5AT SPORT
City	11.1	10.8
Highway	8.3	8.2
